

**COVID-19 and Business Continuity:
Keeping Your Operations
Up and Running in a Crisis**

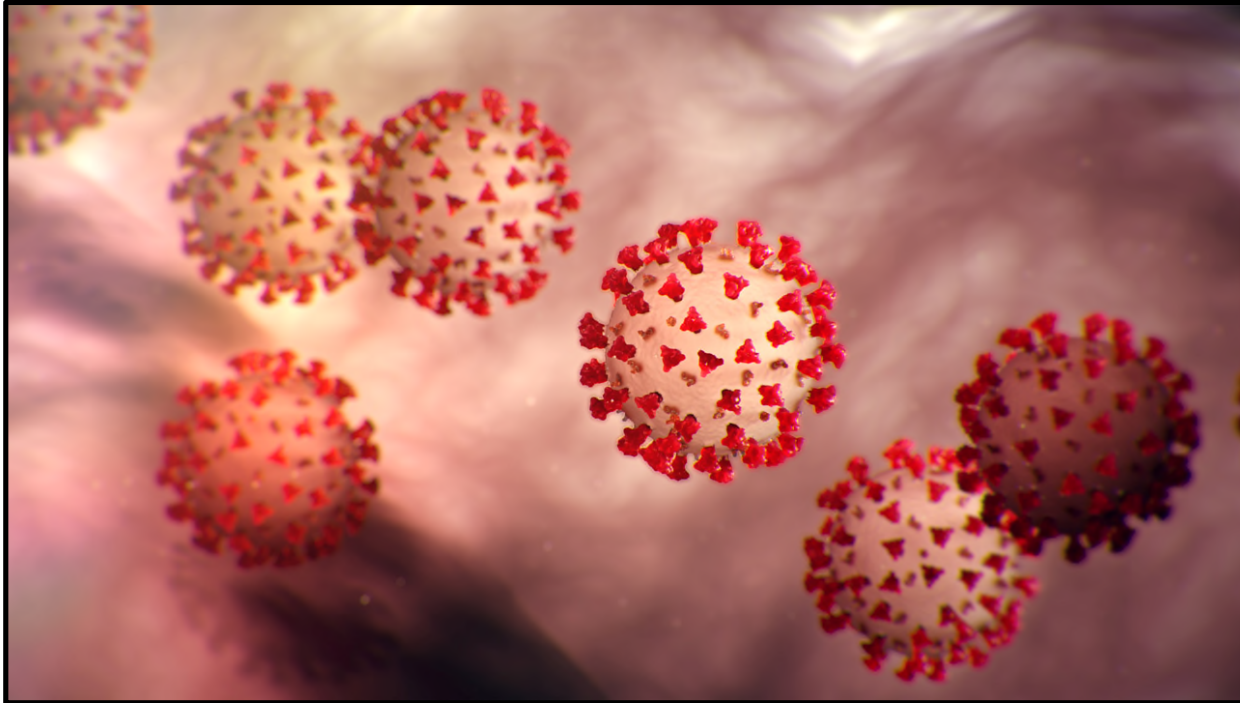

March 17, 2020

Our Speaker

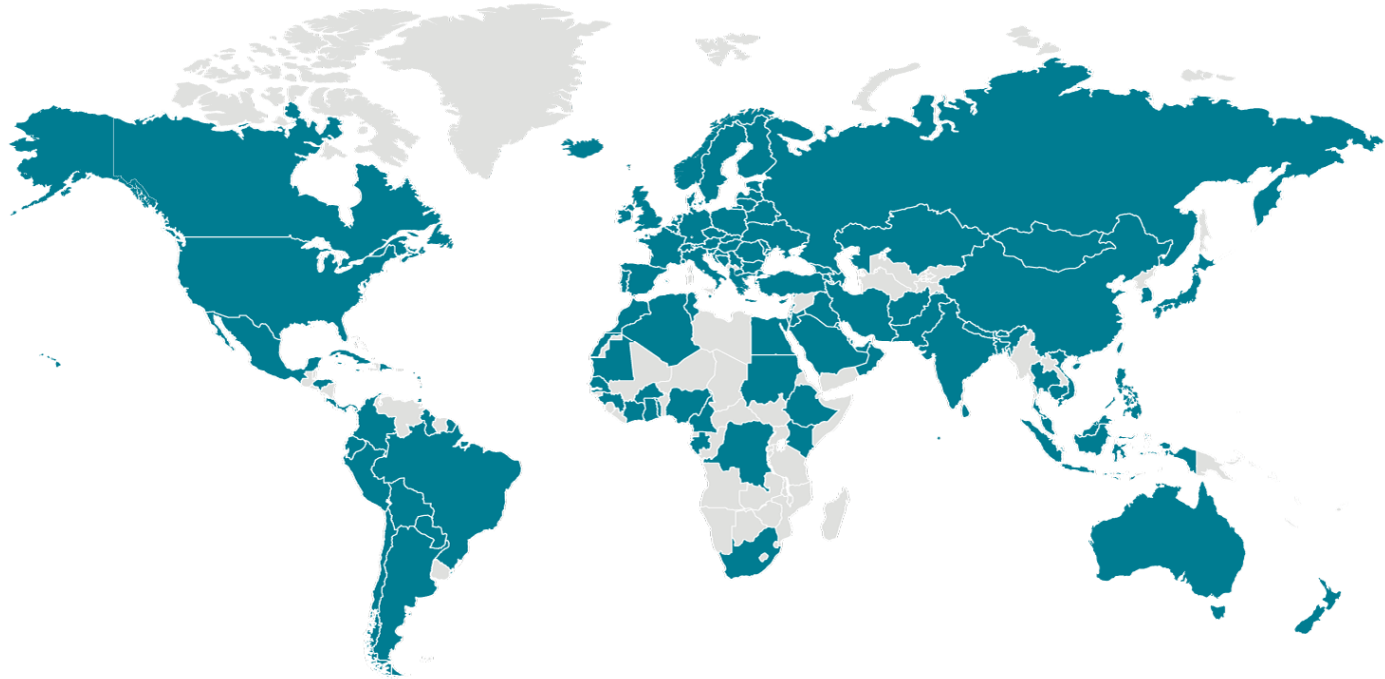

For more than 30 years, Roy Hadley has been a trusted advisor to high growth businesses, governments, and family/closely held businesses. Roy's practice, which is international in scope, includes advising clients worldwide on complex corporate transactions, particularly those involving technology, cybersecurity, life sciences, economic development, telecommunications, outsourcing and intellectual property. With a nod to our increasingly digital world, Roy provides guidance to a wide array of governments, governmental entities, and companies (and their boards) on issues related to data security and privacy.

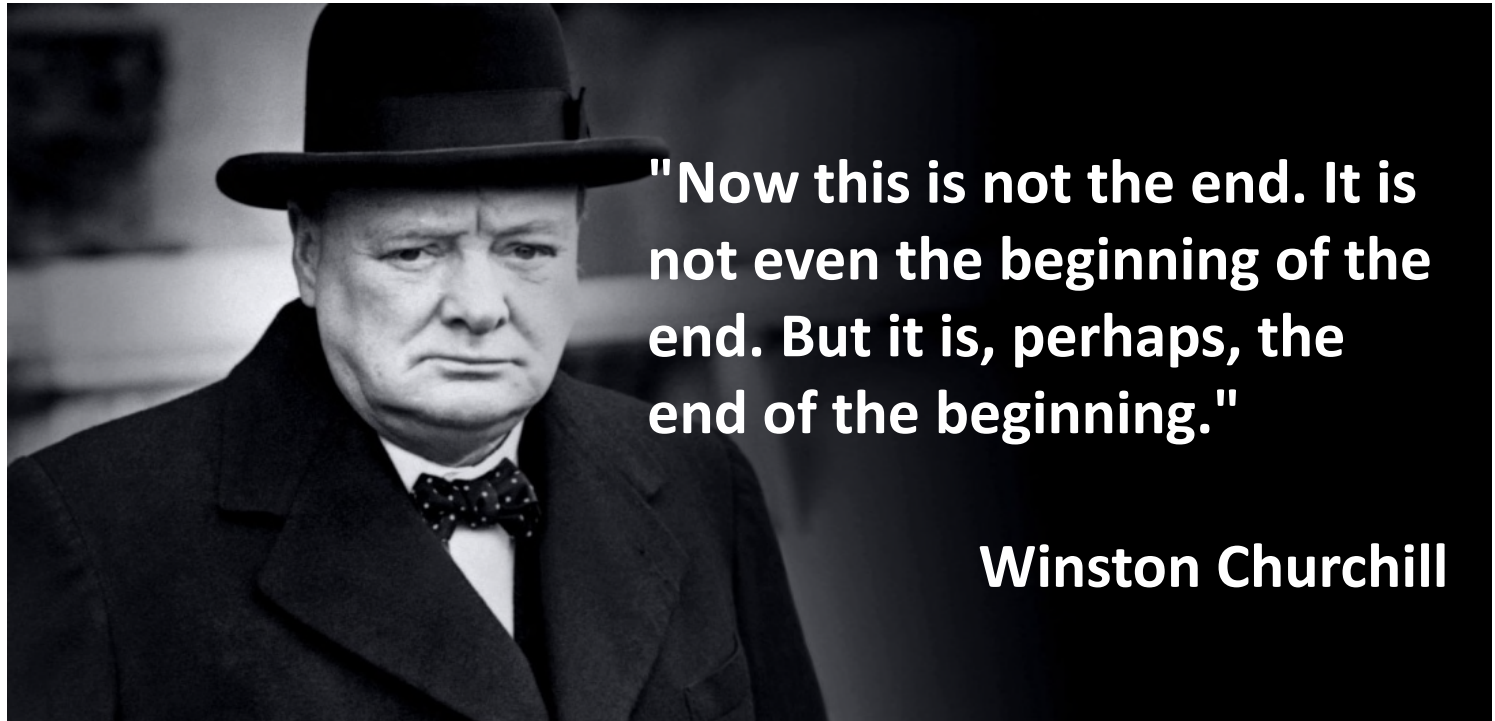

Why are we here today?

The effects are worldwide.

This too shall pass...

"Now this is not the end. It is not even the beginning of the end. But it is, perhaps, the end of the beginning."

Winston Churchill

Things to consider...

...What's next.

Business Continuity Planning VS. Business Continuity Reality

Cyberattacks
will ramp up.

Don't take
your eyes off the ball!

Ransomware attacks
could be particularly
problematic.

Phishing and spear-phishing
will become more prevalent.

Security (and connectivity)
for remote users should be at
the top of your list.

Check your
contracts and communicate
with your vendors.

Capacity and performance
might be a problem.

Don't forget
about
Privacy!

Good cyber hygiene

Things you should
always be doing and
thinking about...

Best practices: cyber hygiene

Educate
Employees

Back up all files
(offline &
offsite)

Security
patching

Strong
passwords

Cyber
insurance

Network
segmentation

Multi-factor
authentication

Active
Directory

Best practices: cyber hygiene

Incident
Awareness/Emergency
Response Planning

Prioritize Information
Technology Funding

Data Audit/Risk
Analysis/Maturity
Assessment

Document/Plan/Be
Nimble/Clear Processes

Know who your vendors
are (and know their
security hygiene)

Check employee
references/ issue
specific levels of
clearance and/or access

Communicate – but not
too much!!

Hire and empower a
CISO

Key takeaways

Prepare for the unexpected.

Nothing will ever go like you thought it would.

Know your vendors.

Be thorough but flexible. Response is “Dynamic.”

Always think about “lessons learned”.
